

# Project Lead – Development of Medical Products & Robotic Systems (Person)

Since BEC Medical plays a leading role in innovative medical robotics technology, our corporate culture and working methods are constantly evolving. Despite this dynamic environment, our focus on excellence remains constant, combined with a determination to create a workplace where we can perform at our best. Does this challenge excite you? If so, you will likely feel very comfortable in our team. However, BEC Robotics is not the right fit for everyone – please check whether our vision and strategy align with your own goals and whether you are ready to grow beyond yourself.

You are an experienced Project Lead (Person) with an interest in medical robotics and a hands-on mentality. You have no fear of people, robots, or operating rooms? Then we are looking for exactly you and your expertise **for our location in Magdeburg!**

Our goal is to create a modern, efficient, and friendly working environment on site, and you will play a central role in making that happen.

## Your Playground:

- Leading AI-based development projects for medical products in surgery
- Interdisciplinary management (AI, Embedded, UI/UX, Regulatory) using agile methods (Scrum, SAFe)
- Developing standards-compliant system architectures (MDR, ISO 13485, IEC 62304)
- Stakeholder communication, technical roadmaps, and quality assurance
- Building a data pipeline
- You have influence over which tools we use and how we shape our processes

## This is how you can impress us:

- 5+ years of professional experience, ideally in regulated industries
- Strong system understanding (hardware & software)
- Experience in technical stakeholder management
- Project management skills and proficiency in agile methods
- High initiative and self-organization
- A hands-on mentality and eagerness to shape and create
- Technical understanding of embedded systems, AI applications, and safety standards
- Very good German and English language skills
- A plus but not a must: experience in robot programming

No matter what your background is – do you feel addressed? Learn more on our careers page: [bec-robotics.com/de/robotics/karriere](https://bec-robotics.com/de/robotics/karriere)
